SUMMARY

Graduated with a Bachelor of Applied Computer Engineering Technology from IPB with a strong interest in the fields of Embedded Systems, IoT, and Web Development. Experienced as an intern researcher at BRIN in the development of FreeRTOS-based satellite On-Board Computer (OBC) and PCB design. Have the ability to build a modern website using React.js with a focus on performance and user experience. Adaptive, quick to learn, and ready to contribute in a dynamic work environment.

EDUCATION

IPB University

Computer Engineering Technology/Applied Bachelor's
GPA 3.59/4

Bogor

August 2021 – August 2025

WORK EXPERIENCE

Streamline Solution Indonesia

Front End Developer (Freelance)

Jakarta

August 2025 – February 2026

- Develop a bilingual company profile website using React (Vite) + TailwindCSS with responsive, interactive, and SEO-optimized pages.
- Improved UI/UX across SSI apps by fixing layout issues, improving mobile responsiveness, and improving navigation elements such as the hamburger menu and the bottom navbar.

BRIN Satellite Technology Research Center

Research Intern

Bogor

January 2025 – May 2025

- Designed schematic and 2-layer PCB layouts for STM32H753VIT6-based satellite On-Board Computers (OBC), optimizing power management for miniature avionics systems.
- Developed FreeRTOS-based real-time firmware capable of telemetry data acquisition with a voltage deviation of $< 0.1\%$.

PROJECT EXPERIENCE

Embedded System – National Research and Innovation Agency

Prototype On-Board Computer (OBC) Satelit

Bogor

January 2025 – May 2025

- Designed a schematic design and layout of a 2-layer PCB for a micro-satellite operational system using EasyEDA, integrating avionics components to support On-Board Computer (OBC) functionality.
- Develop FreeRTOS-based firmware on STM32H753VIT6 microcontrollers to process data management and task execution in *real-time*.
- Implement data acquisition systems for LM135AH temperature sensors and INA3221-voltage current-sensors (I2C/Analog protocols) with high accuracy (voltage deviation $< 0.1\%$).
- Establish a system for logging telemetry data consistently every 1 second to the storage medium, as well as validate the reliability of the system through functional testing to ensure an efficient power consumption profile.

Internet of Things (IoT) – IPB University

IoT-Based Fish Automated Metered Feed System

Bogor

February 2024 – July 2024

- Develop cost-effective smart aquaculture solutions, automatically controlling 5+ sensors and actuators (temperature, pH, TDS, motor) to improve operational efficiency for local farmers.
- Empowering users with real-time control through full integration to the Blynk IoT platform, enabling remote monitoring and adjustment of feed doses and reducing the potential for crop failures

CAPABILITIES

Languages: English (active), Arabic (active)

Software: Word, Excel, PPT, Corel Draw, Canva, EasyEDA, STM32CubeIDE, Arduino IDE

Technology & Programming:

Embedded System: STM32, ESP32, Arduino

Hardware Design: Schematic & PCB Design, Circuit Debugging, Soldering, Multimeter.

IoT & Communication: Blynk IoT, Sensor Integration (pH, TDS, Temperature)

Programming: C++, JavaScript (React, Node.js), SQL.

CERTIFICATIONS/COMPETENCIES

IoT-Based Embedded System Programming – BBPVP Bekasi

April 2026

Network Administrator – BNSP Competency Certificate

October 2025

[Certificate.pdf](#)

Bisa AI Academy (Cyber Security) – MSIB Batch 6 Merdeka Campus

June 2024

[Certificate.pdf](#)

LEADERSHIP/ORGANIZATIONAL EXPERIENCE

Alumni Career Center – IPB Vocational School Alumni Association

Bogor

Membership & Social Media

January 2024 - Present

- Make branding posters related to information on job vacancies, internships, activities and so on that are published on the Instagram Alumni Career Center
- Create an attractive design for Instagram social media acc_svipb

DKM Al Ghifari Mosque IPB

Bogor

Head of Takmir of Al Ghifari Mosque IPB

August 2023 – August 2024

- Leading and supervising 10 members who serve as treasurers, secretaries, public relations and publications and facilities of mosque infrastructure
- Supervise the implementation of activities that require funds such as Ramadan, Eid al-Fitr, Eid al-Adha.
- Lead and supervise the building, facilities and infrastructure of the mosque.
- Supervising the recruitment process of the committee at committee events such as Eid prayers, Eid al-Adha/qurbani by facing 1000 worshippers

LDK Al Ghifari IPB

Bogor

Head of the Islamic Program Department

February 2023 – November 2023

- Lead strategic planning, execution, and evaluation for the entire department's work programs that focus on the spiritual and intellectual development of IPB students.
- Managing and coordinating 3 flagship programs consistently, including Al-Ghifari Mengaji (guidance of the Quran), bi-weekly Routine Study, and daily digital content management One Day One Reminder (ODOR).
